### **Eriez to Introduce Revolutionary New Product at ISRI 2010**

Eriez® has announced a major breakthrough in ASR processing equipment that will revolutionize metal recovery. The new product will be released at the [2010 Scrap Recycling Industry Expo](#) in San Diego, which takes place in May.

Without tipping his hand, President and CEO Tim Shuttleworth said, “There are certain stages of the metal recovery process that, to date, have only been ‘good enough’.” “That is,” he continued, “without a more efficient means of recovery, processors have had to accept reduced revenue — but no longer!” Eriez’ new machine promises to capture a portion of the waste stream that had either been allowed to pass, or had been hand-sorted, a most costly operation.

Shuttleworth continued, “We’re hoping that everyone comes to the ISRI Show to see the unveiling of the machine, but also to witness the remarkable performance of Eriez’ other advances in separation technology.” The company also plans to demonstrate all major equipment in the booth, including the new ProSort II Airless Metal Recovery System and RevX-E™ Eddy Current Separator.

Eriez’ Heavy Industries Project Manager, Mike Shattuck commented, “Eriez builds the strongest and highest quality products using our financial strength to invest in continuous product improvements, especially in the recycling industry. We were extremely fortunate in 2009. While many companies suffered due to the economy, Eriez flourished. If you don’t innovate, you won’t make it. These new products are a direct result of our dedication to innovation and listening to our customers.”

Stay tuned — more specific product details are forthcoming.

Eriez is recognized as world authority in advanced technology for magnetic, vibratory and inspection applications. The company’s magnetic lift and separation, metal detection, x-ray, materials feeding, screening, conveying and controlling equipment have application in the process, metalworking, packaging, recycling, mining, aggregate and textile industries. Eriez manufactures and markets these products through ten international facilities located on six continents. For more information, call toll-free (888) 300-ERIEZ (3743) within the U.S. and Canada. For online users, visit [www.eriez.com](http://www.eriez.com) or send e-mail to [eriez@eriez.com](mailto:eriez@eriez.com). Eriez World Headquarters is located at 2200 Asbury Road, Erie, PA 16506.
